At the request of the plan sponsor, this report summarizes the COLA Fund for the City of Miami Fire Fighters and Police Officers as of 1/1/2021. The purpose of this report is to communicate the following results of the valuation:

- 10/1/2020 Asset Information;
- 1/1/2021 COLA Fund Amounts.

This report has been prepared for the above purposes. Consequently, it may not be appropriate for other purposes. Please contact Nyhart prior to disclosing this report to any other party or relying on its content for any purpose other than that explained above. Failure to do so may result in misrepresentation or misinterpretation of this report.

The results in this report were prepared using information provided to us by other parties. The census information has been provided to us by the Plan Administrator. Asset information has been provided to us by the Plan Administrator. We have reviewed the provided data for reasonableness when compared to prior information provided, but have not audited the data. Where relevant data may be missing, we have made assumptions we believe to be reasonable. We are not aware of any significant issues with and have relied on the data provided. Any errors in the data provided may result in a different result than those provided in this report.

The funding method, interest rates and mortality used in determining the COLA fund were determined by the Board. Evaluation of the reasonableness of these methods and assumptions was outside the scope of our assignment. In our opinion, all other actuarial assumptions and methods are individually reasonable and in combination represent our best estimate of anticipated experience of the plan.

Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following:

- plan experience differing from that anticipated by the economic or demographic assumptions;
- changes in economic or demographic assumptions;
- increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period or additional cost or contribution requirements based on the plan's funded status); and
- changes in plan provisions or applicable law.

We did not perform an analysis of the potential range of future measurements due to the limited scope of our engagement. This report has been prepared in accordance with generally accepted actuarial principles and practice.

Neither Nyhart nor any of its employees have any relationship with the plan or its sponsor which could impair or appear to impair the objectivity of this report. To the extent that this report or any attachment concerns tax matters, it is not intended to be used and cannot be used by a taxpayer for the purpose of avoiding penalties that may be imposed by law.

The undersigned are compliant with the continuing education requirements of the Qualification Standards for Actuaries Issuing Statements of Actuarial

Opinion in the United States.

| Total | 4,324 | 4,297 |

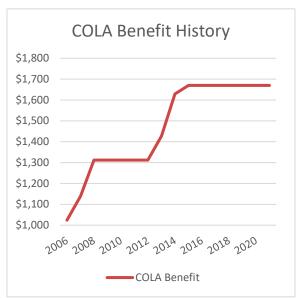

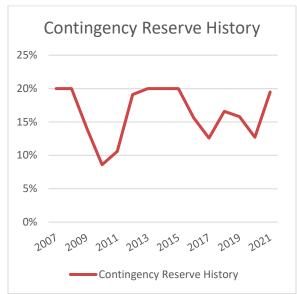

Changes Since Prior Valuation and Key Notes

Based on a target reserve of 20%, we recommend keeping the COLA table at its current level of (\$1,670) as of January 1, 2021. The contingency reserve is 19.50%, an increase from the prior year's 12.7%. A historical graph of the COLA table level and contingency reserve amount are below.

The mortality assumption was updated to match the recent change to the Florida Retirement System (FRS) mortality tables. The 2018 FRS mortality tables were based on the RP-2000 mortality tables, with future mortality improvements reflected using mortality improvement Scale BB. The 2019 FRS mortality tables were based on the Pub-2010 Mortality Tables for public sector retirement plans and MP-2018 generational improvements. The tables were developed from data collected for 2008-2013. This change decreased the COLA liability.

Plan Maturity Measures – October 1, 2020

Each pension plan has a distinct life-cycle. New plans promise future benefits to active employees and then accumulate assets to pre-fund those benefits. As the plan matures, benefits are paid and the pre-funded assets begin to decumulate until ultimately, the plan pays out all benefits. A plan's maturity has a dramatic influence on how risks should be viewed. The following maturity measures illustrate where the COLA Fund of the City of Miami Fire Fighters' and Police Officers' Retirement Trust falls in its life-cycle.

Duration of Liabilities: 10.80

Duration is the most common measure of plan maturity. It is defined as the sensitivity of the liabilities to a change in the interest rate assumption. The metric also approximates the weighted average length of time, in years, until benefits are expected to be paid. A plan with high duration is, by definition, more sensitive to changes in interest rates. A plan with low duration is more susceptible to risk if asset performance deviates from expectations as there would be less time to make up for market losses in adverse market environments while more favorable environments could result in trapped surplus from gains. Conversely, high duration plans can often take on more risk when investing, and low duration plans are less sensitive to interest rate fluctuations.

Demographic Distribution - Ratio of Actively Accruing Participants to All Participants: 44.90%

A plan with a high ratio is more sensitive to fluctuations in salary (if a salary-based plan) and statutory changes. A plan with a low ratio is at higher risk from demographic experience. Such a plan should pay close attention to valuation assumptions as there will be less opportunity to realize future offsetting gains or losses when current experience deviates from assumptions. Plans with a low ratio also have limited opportunities to make alterations to plan design to affect future funded status.

Asset Leverage - Ratio of Payroll for Plan Participants to Market Value of Assets: 14.30%

Younger plans typically have a large payroll base from which to draw in order to fund the plan while mature plans often have a large pool of assets dedicated to providing benefits to a population primarily consisting of members no longer on payroll. Plans with low asset leverage will find it more difficult to address underfunding, as the contributions needed to make up the deficit will represent a higher percentage of payroll than for a plan with high asset leverage.

Benefit Payment Percentage - Ratio of Annual Benefit Payments to Market Value of Assets: 6.31%

As a plan enters its decumulation phase, a larger percentage of the pre-funded assets are paid out each year to retirees. A high percentage is not cause for alarm as long as the plan is nearly fully funded. However, such a plan is more sensitive to negative asset performance, especially if cash contributions are not an option to make up for losses.

Identification of Risks

The results presented in this report are shown as single point values. However, these values are derived using assumptions about future markets and demographic behavior. If actual experience deviates from our assumptions, the actual results for the plan will consequently deviate from those presented in this report. Therefore, it is critical to understand the risks facing this pension plan. The following table shows the risks we believe are most relevant to the COLA fund of the City of Miami Fire Fighters' and Police Officers' Retirement Trust. The risks are generally ordered with those we believe to have the most significance at the top. Also shown are possible methods by which a more detailed assessment of the risk can be performed.

Type of Risk Method to Assess Risk

| Investment Return | Scenario Testing; Asset Liability Study |
|-----------------------|---|
| Interest Rates | Scenario Testing; Asset Liability Study |
| Participant Longevity | Stress Testing; Scenario Testing |
| Early Retirement | Stress Testing; Scenario Testing |

Reviewing Results under Various Test Scenarios

To help the Board better understand how the COLA results are impact by assumption changes and changes to the COLA, the following test scenarios were completed. The scenarios are not recommendations and are only intended to identify how valuation results change based on inputs to the valuation.

Scenario 1 – Interest Rate lowered by 25 basis points.

Scenario 2 – Standard COLA increase from 2019 to 2020, future COLA growth declines by 10%

Scenario 3 – Standard COLA increase from 2019 to 2020, future COLA growth declines by 50%

Note the COLA table has built in scheduled increases for each year the retiree is in retirement. For example, a retiree with 25 years of service at retirement and has been retired for 22 years, the monthly amount would increase \$84 (\$1,670 to \$1,754). In the indicated scenarios where a future COLA growth declines, it means there would still be growth but at a smaller amount. For example, under the "COLA growth declines by 10%" scenario, instead of the standard COLA growth of approximately \$84 per month, it would be approximately \$76 increase per month.

| Scenario | Baseline | Lower Interest Rate | Standard 2021 COLA Increase, COLA Growth Declines by 10% After 2021 | Standard 2021 COLA Increase, COLA Growth Declines by 50% After 2021 |
|-------------------------------------|---------------|------------------------|---|---|
| Interest Rate | 7.34% | 7.09% | 7.34% | 7.34% |

The amount of assets backing the pension promise is the most significant driver of volatility and future costs within a pension plan. The investment performance of the assets directly offsets the ultimate cost.

¹The assumptions and plan provisions used can be found in the October 1, 2019 Valuation Report.

Plan Status

January 1, 1994 amended January 1, 1995

Eligibility for Participation

All inactive members in Miami Firefighters' and Police Officers' Retirement Trust

Available Assets:

Existing COLA assets as of January 1, 1995; beginning with the 1991/92 fiscal year, a percentage of excess investment return on FIPO assets (75% of first 2.5%, 50% of next 2.5%, 25% of next 2.5%), subject to a minimum City contribution of \$2.5 million, increasing 4% annually.

Allocated Assets:

Current COLA assets as of September 30, 2020, plus present value of \$2.5 million minimum guarantee. The 4% future annual increases is not preallocated. A contingency reserve of 20% has been established for adverse experience.

COLA Benefits:

In addition to prior COLA, benefits are based on attached table, with \$1,670 monthly benefit for 25 years of creditable service and 22 completed years of retirement (after age 46). The \$1,670 amount is reduced by 5% for each year of retirement less than 22 and each year of creditable service less than 25 and increased similarly for years of retirement greater than 22 and years of creditable service greater than 25.

Benefits are based on the FIPO option elected. Tabular amounts are adjusted, based on the FIPO adjustments at the time of FIPO benefit commencement, for options other than Option 8 (Joint & 40%). Surviving spouses receive the percentage of the table amount determined under the FIPO election.

Service-incurred and accidental disabilities and deaths receive benefits based on the greater of 25 years or actual creditable service.

Creditable Service

For Vesting and Benefit Accrual

Service credited under Retirement System; military service (maximum of four years) during wartime for which Member makes contributions; maternity leave (maximum of 180 days for each leave) for which Member makes contributions; up to 5 years, without member contributions, if member was an employee before period of military service.

Accumulated leave balances may be transferred into system immediately prior to retirement to purchase up to 3 whole years of additional Creditable Service, on an actuarially equivalent basis.

457 balances of Firefighters may be transferred into System at retirement to purchase up to 3 whole years of additional Creditable Service for multiplier purposes.

Payment Forms

Normal Form

For Police Officers who have reached Rule of 64 by 9/30/2010 or Fire Fighters who reached Rule of 64 by 9/30/2009 or members who were vested at 9/27/2010: Joint and 40% Contingent Survivor with a minimum 10 years Certain and Life

For Fire Fighters who have reached Rule of 68 by 9/30/2010: Joint and 40% Contingent Survivor with a minimum of 10 years Certain and Life

For all others:

Benefits based on service prior to 10/1/2010: Joint and 40% Contingent Survivor with minimum of 10 years Certain and Life

Benefits based on service after 9/30/2010: 10 years Certain and Life

Optional Forms

Option 1 – Cash refund annuity based on Present Value at retirement

Option 2 – Joint and 100% Contingent Annuity

Option 3 – Joint and 50% Contingent Annuity

Option 4 - Joint and Contingent Annuity approved by the Board

Option 5 - Determined by Board due to incapacity of member

Option 6 – Withdrawal of member contributions with interest and benefit that is ½ of normal level.

Changes since prior valuation

There have been no changes to the plan provisions from the prior valuation report.

Cost Method

Accrued Benefit Cost Method, based on benefits granted to date

Asset Valuation Method

Market Value, plus present value of future minimum City contributions

Interest Rates

7.34% net of investment expenses

Support for the discount rate assumption has been provided in the experience study report dated December 2017.

Annual Pay Increases

3.25% inflation and 1.5% for promotions and other increases plus salary merit scale below

| <u>Service</u> | <u>Police</u> | <u>Fire</u> |
|----------------|---------------|-------------|
| 0-6 | 5.0% | 5.0% |
| 7 | 2.5% | 5.0% |
| 8-9 | 5.0% | 5.0% |
| 10-14 | 1.0% | 0.0% |
| 15-16 | 1.25% | 2.5% |
| 17-21 | 1.0% | 1.0% |
| 22+ | 0.0% | 0.0% |

There is no additional increase at retirement.

The annual pay increases are based on a study of actual experience for the plan during 2015-2017. See the experience study report dated December 2017.

Expense

None assumed

Compensated Absence Balance Transfers

No liabilities or costs are included for the provision to transfer compensated absence balances into FIPO to purchase additional creditable service, based on our understanding that assets will be transferred immediately prior to retirement to cover 100% of the liability for the additional service.

Marital Status and Ages

100% of Members are assumed to be married. Female spouses assumed to be 3 years younger than male spouses.

Mortality Rates

Post-Retirement:

Disabled:

Retirement Rates

Pub-2010 Generational using scale MP-2018; Females, Headcount Weighted Safety Employee Female Table, set forward 1 year; Males, Headcount Weighted Safety Below Median Employee Male Table, set forward 1 year.

Pub-2010 Generational using scale MP-2018; Females, Headcount Weighted Safety Healthy Retiree Female Table, set forward 1 year; Males, Headcount Weighted Safety Below Median Healthy Retiree Male Table, set forward 1 year

Pub-2010; Females, 80% Headcount Weighted General Disabled Retiree Female Table / 20% Headcount Weighted Safety Disabled Retiree Female Table; Males, 80% Headcount Weighted General Disabled Retiree Male Table / 20% Headcount Weighted Safety Disabled Retiree Male Table.

The mortality rate assumptions were set in accordance with the Florida Retirement System Valuation report dated December 2019. The board adopted the new mortality tables for the October 1, 2019 valuation.

If eligible for Retirement, the following decrements apply, based on service.

| Years of Service | <u>Police %</u> | <u>Fire %</u> |
|------------------|-----------------|---------------|
| <20 | 0 | 0 |
| 20 | 10 | 10 |
| 21-24 | 3 | 3 |
| 25-29 | 40 | 5 |
| 30-34 | 50 | 25 |
| 35 | 100 | 25 |
| 36 | | 25 |
| 37 | | 100 |
| | | |

All Members are assumed to elect a 5-year BackDROP when they reach five years following first retirement eligibility.

The assumed retirement rates are based on a study of actual experience for the plan during 2015-2017. See the experience study report dated December 2017.

Withdrawal of Employee Contributions

It is assumed that employees do not withdraw their contribution balances upon employment termination or retirement.

Disability Rates

100% of the disabilities are expected to be accidental with the following probabilities. No recovery is assumed.

| <u>Age</u> | <u>Rates</u> |
|------------|--------------|
| 35 | 0.1425% |
| 40 | 0.1950% |
| 45 | 0.4000% |
| 50 | 0.6050% |

The disability rates are based on a study of actual experience for the plan during 2015-2017. See the experience study report dated December 2017.

Based on Years of Creditable Service using the rates below

| <u>Age</u> | <2 | Between 2 to 5 | 5+ |
|------------|-------|----------------|-------|
| 30 | 3.60% | 2.40% | 1.92% |
| 35 | 3.60% | 2.40% | 1.92% |
| 40 | 2.70% | 1.80% | 1.44% |
| 45 | 1.80% | 1.20% | 0.96% |
| 50 | 0.00% | 0.00% | 0.00% |

The withdrawal rates are based on a study of actual experience for the plan during 2015-2017. See the experience study report dated December 2017.

The mortality assumption was updated to match a recent change to the Florida Retirement System mortality for the July 1, 2019 valuation report.

| | a. Retirees and beneficiaries receiving benefits and terminated members not yet receiving | 366.1 | \$344.9 | | | |
| | b. Current Employees | | | | | |
| | Accumulated employee contributions including interest | 0 | 0 | | | |
| | Employer-financed vested | 0 | 0 | | | |
| | Employer-financed nonvested | 81.1 | \$74.1 | | | |
| | c. Total pension benefit obligation (a+b+c) | \$447.2 | \$419.0 | | | |
| 3. | Net assets available for benefits | \$412.1 | \$416.0 | | | |
| 4. | Unfunded pension benefit (obligation)/asset [(3)-(2)] | (\$35.1) | (\$3.0) | | | |

The pension benefit obligations were determined as part of actuarial valuations at January 1, 2021 and January 1, 2020, based on data and asset information at September 30, 2020 and September 30, 2019. Significant actuarial assumptions used include (a) a rate of return on the investment of present and future assets of 7.34% per year compounded annually, (b) post retirement COLA benefits based on the table in effect at January 1, 2021 and January 1, 2020. All plan provisions and other assumptions not listed above can be found in the January 1, 2021 COLA Fund Report.

GASB 5 - COLA Fund

Contributions required and contributions made

The funding policy provides for annual employer contributions from January 1, 1994. The amount of the contribution was \$2.5 million, beginning January 1, 1994, increasing 4% per year each year thereafter, and reduced (but not below zero) by any excess investment income transfer due on the same date.

The excess investment income transfer consists of a portion of gains due to investment return exceeding the 7.34 percent assumption
